PROJECTS

properDM (WebSocket Based Chat Application)

| *Personal Project*

- Created a **real-time chat application** using **WebSocket**
- Implemented **server-side logic** (mocking of data from JSON file) with **Express/Node.js, FS library** and managed WebSocket connections
- Simple frontend with **ReactJS** to handle real-time message rendering and user interactions
- Skills Acquired \implies **TypeScript, Express/Node.js, WebSocket(NPM), ReactJS, Real-Time Rendering**

Code JUDGE (Reply Request Pattern)

| *Personal Project*

- Developed an **code judging system** utilizing **Judge0** for code evaluation and a **Pub/Sub system**
- Implemented a **Reply Request Pattern** using **RabbitMQ** and **Docker** to manage code submission and evaluation responses
- Enabled real-time code evaluation and result delivery via a reliable messaging system
- Skills Acquired \implies **Judeg0 APIs, Pub/Sub Systems, RabbitMQ, Docker**

Song Slayer

| *Personal Project*

- Song Voting Application **WebSocket** based **writting in-memory** songs list
- Added upvote feature most upvoted song will be sent to **QUEUE** to be played
- Skills Acquired \implies **Typescript, WebSocket(NPM) & Rendering**

Personal Blog site

| *Personal Site*

- Zola based **Static Blog site** hosted in **GitbHub Pages**.
- Skills Acquired \implies **HTML, CSS & Markdown**

TECHNICAL SKILLS

- **Programming Languages** : TypeScript, JavaScript, Basics of Python, Java, Springboot, Maven & LaTeX
- **JS EcoSystem based Technologies** : RPCs (tRPC & gRPC), MongoDB, Express Node Js, React/Next Js, Zod, TailWind, MaterialUI
- **Miscellaneous Technologies** : MarkDown, Redis, DrizzalORM, Prisma, RabbitMQ, Docker, GraphQL, WebSockets, MonoRepo, Caddy, Linux, Bash, Git, GitHub
